Genuine Ingenuity

At Gresham Smith, we apply our genuine ingenuity to develop Transportation Systems Management & Operations (TSM&O) solutions to improve safety, mobility and reliability for all transportation users. As innovators with a diverse background in developing cost effective and impactful solutions, we take a personal approach to partnering with our clients to maximize the utility and resiliency of their infrastructure assets. Let's work together to improve the communities we call home.

InLine

30 YEARS

ELEVATE PAVING THE WAY TO INTEGRATE SAFER HIGHWAYS INNOVATE

Strategic Traffic Management

Optimize urban and interstate flows, reduce congestion, and enhance the overall efficiency of your road networks.

Infrastructure Maintenance

Maintain the health of your ITS with predictive diagnostics, proactive repairs, and consistent system upgrades.

Safety & Security with Wrong Way Detection

Innovative Wrong Way Detection Systems (WWDS) minimize the risk of head-on collisions. Real-time alerts, automatic sign illumination, and notifications to law enforcement.

Dynamic Message Signs (DMS)

Instantly relay crucial traffic updates, warnings, or detour information directly to drivers, ensuring real-time communication and enhanced road safety.

Roadway Lighting Solutions

Illuminate your roadways with energy-efficient, smart lighting systems.

Real-time Fiber & Wireless Networking Solutions

Stay connected with high-speed, resilient, and scalable networking options tailored to DOT needs.

Data-Driven Decision Making

Harness the power of big data and predictive analytics to make informed investments and traffic policy decisions.

Why DOTs Trust InLine:

1. Specialized Solutions:

Tailored Intelligent Transportation Systems (ITS), including Wrong Way Detection Systems (WWDS), Dynamic Message Signs (DMS), lighting, and advanced networking solutions, designed specifically for Department of Transportation needs.

2. Regulatory Compliance:

Ensuring your operations meet and exceed local, state, and federal regulations.

3. Integration Excellence:

Seamless integration with existing DOT systems, databases, and operational protocols.

4. End-to-End Support:

From initial consultation to deployment and beyond, InLine is your committed partner.

www.itsanswers.com

Introduction:

Ozark Traffic Management, LLC was founded in March 2016 as a spinoff of its sister company Ozark Safety Services, LLC. Headquartered in Montgomery, AL with offices in Port Allen and Cottonport, LA, they can service customers throughout the Southeast. The vision for Ozark Traffic Management was to build on Ozark Safety's experience in the permanent and temporary sign market by adding the fast growing ITS and electrical elements to its resume.

Intelligent Transportation Systems:

- CCTV
- Dynamic Message Signs
- Radar Vehicle Detectors
- Road Weather Information Systems
- Bluetooth Detectors
- Electrical Services
- Underground and Aerial Fiber Networks
- Wireless Networks

Temporary ITS:

Ozark Traffic Management provides deployment and integration services for temporary ITS (smart work zones) with the goal of improving traffic operations and safety by providing real time information to the travelling public. They apply the same expertise and hardware from the permanent ITS installations to deliver a high-quality system designed to mitigate accidents through a work zone and ultimately save lives.

Permanent Construction and Maintenance:

Ozark Traffic Management provides construction and maintenance services for permanent intelligent transportation systems, traffic signals, highway lighting, electric vehicle charging stations, and fiber/wireless networks. They have multiple underground, electrical, and general construction crews as well as trained ITS technicians ready to turnkey your next project.
